

WHAT DO YOUR TREE TAGS MEAN?

The California Department of Food and Agriculture (CDFA) places tags on trees for the following reasons:

To indicate the tree has been surveyed/inspected for the plant disease Huanglongbing by CDFA crews. This tree tag has been inspected, and can be yellow, blue or white.

If it's a sticky tag, these traps help officials track the presence of pests, such as the Asian citrus psyllid, which can carry Huanglongbing.
